# POOL OF LICENSING CONDITIONS

# Licensing Act 2003

When preparing a new or variation application for a premises licence or club premises certificate applicants are required to describe the steps they intend to take to promote the following four licensing objectives:

- the prevention of crime and disorder
- public safety
- the prevention of public nuisance
- the protection of children from harm.

North Devon Council has produced this pool of licensing conditions to assist applicants in completing this section of their application and to promote a consistent approach in the wording of conditions. It is intended to provide a broad range of conditions that should cover most eventualities, however those persons wishing to host large one off events e.g. festivals are alternatively recommended to examine the Council's Safety Advisory Group website: <a href="www.northdevon.gov.uk/sag">www.northdevon.gov.uk/sag</a>

All premises licences and club premises certificates will be subject of mandatory conditions prescribed by the Licensing Act 2003. It is suggested that applicants examine the list of these which can be found on <a href="www.northdevon.gov.uk/licensing">www.northdevon.gov.uk/licensing</a>. All further conditions imposed should be tailored to the particular circumstances of an individual premises and determined on a case-by-case basis. They should reflect how applicants will promote these licensing objectives having regard to the nature and type of venue, proposed licensable activities, location, operating times, anticipated clientele etc. For example, if an application relates to a restaurant, the measures or controls expected to implemented will be less than a nightclub or music festival.

Conditions which are appropriate to promote the licensing objectives should initially emerge from a prospective licence holder's risk assessment and then be translated to form part of the operating schedule for the premises. Any conditions, controls or restrictions that are offered by applicants in their operating schedule will be added to a licence or certificate and as such will govern the way in which licensed premises are managed. In the circumstances where words or phrases used in an operating schedule are confusing, unenforceable etc., rather than reproducing those terms, minor amendments may be made by the Licensing Authority. Furthermore the Licensing Authority will not impose conditions which it believes are duplicated in other legislation.

This pool of conditions is not intended to form an exclusive or exhaustive list of conditions which should be included on a licence or certificate. Applicants should consider offering conditions that are appropriate, necessary and proportionate in the circumstances of their particular application. Moreover, the pool does not restrict any applicant, responsible authority, or other person from proposing any alternative conditions, nor does it restrict the Council's Licensing Sub-Committee from imposing any reasonable condition on a licence it considers appropriate for the promotion of the licensing objectives (after representations have been received to an application and by way of a hearing).

Guidance states that conditions are important in setting the parameters under which premises can lawfully operate. As such applicants should consider whether conditions can be met and be mindful as to whether what they have offered is practical, realistic and enforceable. A breach of condition constitutes an offence for which those found guilty may face an unlimited fine and/or six months imprisonment.

Before an application is submitted we recommend that applicants contact any relevant responsible authorities (see <a href="https://www.northdevon.gov.uk/licensing">www.northdevon.gov.uk/licensing</a> for contact details) to discuss their application. They may suggest conditions that should be considered prior to submission, which may reduce the likelihood of a responsible authority or member of the public submitting a representation (objection). Responsible authorities may contact you after the submission of your application to suggest amendments to your operating schedule, particularly if you have not contacted them previously.

Additional information on conditions can be found in the Section 182 guidance to the Licensing Act 2003 available on the GOV.UK website. Comments on the content and use of the pool of conditions are welcomed. Please contact the Licensing Team on 01271 388 870 or via licensing@northdevon.gov.uk

## NOTE FROM LICENSING AUTHORITY ON IMPOSITION OF CONDITIONS **SURROUNDING CCTV:**

When considering the use of surveillance camera systems as part of the conditions attached to a licence or certificate, applicants and responsible authorities should have particular have regard to Guiding Principle One in the Surveillance Camera Code of Practice (June 2013) issued by the Home Office which can be found at:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\_data/ file/204775/Surveillance Camera Code of Practice WEB.pdf

A blanket attachment of surveillance camera conditions are likely to give rise to concerns about the proportionality of such an approach and will require an appropriately strong justification and be kept under regular review. Applications in relation to licensed premises must take into account whether a requirement to have a surveillance camera system is appropriate in the particular circumstances of the case. For example, it is unlikely that a trouble-free community pub would present a pressing need such that a surveillance camera condition would be justified.

### Guiding Principle One is shown below for information:

Surveillance camera systems operating in public places must always have a clearly defined purpose or purposes in pursuit of a legitimate aim and be necessary to address a pressing need (or needs). Such a legitimate aim and pressing need might include national security, public safety, the economic well-being of the country, the prevention of disorder or crime, the protection of health or morals, or the protection of the rights and freedoms of others. That purpose (or purposes) should be capable of translation into clearly articulated objectives against which the on-going requirement for operation or use of the systems and any images or other information obtained can be assessed.

In assessing whether a system will meet its objectives, and in designing the appropriate technological solution to do so, a system operator should always consider the requirements of the end user of the images, particularly where the objective can be characterised as the prevention, detection and investigation of crime and the end user is likely to the police and the criminal justice system.

A surveillance camera system should only be used in a public place for the specific purpose or purposes it was established to address. It should not be used for other purposes that would not have justified its establishment in the first place. Any proposed extension to the purposes for which a system was established and images and information are collected should be subject to consultation before any decision is taken.

D48	The premises shall install operate and maintain a comprehensive digital colour CCTV system to the satisfaction of the Police and local authority
	All public areas of the licensed premises including entry and exit points will be covered, including any outside areas under the control of the premises licence holder.
	The system must record clear images permitting the identification of individuals, and in particular enable facial recognition images (a clear head and shoulder image) of every person entering and leaving in any light condition.
	The CCTV system will continually record whilst the premises are open for licensable activities and during all times when customers remain on the premises.
	All equipment must have a constant and accurate time and date generation.
	All recordings will be stored for a minimum period of 14 days with date and time stamping. (Offers on applications in excess of 14 days are acceptable).
	Viewable copies of recordings will be provided on request to the Police and local authority officers as soon as is reasonably practicable and in accordance with the Data Protection Act 2018 (or any replacement legislation) OR a staff member from the premises who is conversant with the operation of the CCTV system, shall be on the premises at all times when the premises are open. This staff member must be able to provide an authorised officer of a responsible authority, copies of recent CCTV images or data with absolute minimum of delay when requested in accordance with the Data Protection Act 2018 (or any replacement legislation).
	The applicable condition will be based on the size/location and business operation of the premises, assessed on an individual basis.
	The CCTV system will be capable of downloading images to a recognisable viewable format.
	There will be security measures in place to ensure the integrity of the system to prevent the tampering with, and deletion of, images.
D49	The CCTV system will be fully compliant with the guidance contained in the Information Commissioner's Office (ICO) guidance document <a href="www.ico.org.uk">www.ico.org.uk</a> (or any renewed equivalent guidance which is subsequently issued) regarding installation of CCTV is provided at the premises.
D50	If the CCTV equipment (including any mobile units in use at the premises) breaks down the Licensing Authority and the Police must be informed as soon as is reasonably practicable. This information shall be contemporaneously recorded in an incident report register and shall include the time, date and means this was done and to whom the information was reported. Immediate steps must be taken to put the equipment back into action. The Licensing Authority and the Police shall be informed when faults are rectified.
D51	A staff member from the premises who is conversant with the operation of the CCTV system shall be on the premises at all times when the premises are open. This staff member must be able to provide an authorised officer of a responsible authority copies of recent CCTV images or data with the absolute minimum of delay when requested (in accordance with the Data Protection Act 1998 or any replacement legislation).
